

CHEERS 2022 Checklist

CHEERS 2022 Checklist

Scope: The Consolidated Health Economic Evaluation Reporting Standards (CHEERS) 2022 statement provides a 28-item checklist to promote transparent and comprehensive reporting of economic evaluations of health interventions.

Reference: See `source/archetypes/cheers-2022.yml` for canonical link and provenance.

Instructions

- Use task list items for checklist boxes; these become interactive checkboxes in PDF.
- Use a span with class `.textfield` for free-text fields.

Title and Abstract

- ☐ **Title:** Identify the study as an economic evaluation and specify the interventions being compared.
- ☐ **Abstract:** Provide a structured summary detailing the context, key methods, results, and alternative analyses.

Introduction

- ☐ **Background and Objectives:** Describe the study's context, the research question, and its relevance for policy or practice.

Methods

- ☐ **Health Economic Analysis Plan:** Indicate if a health economic analysis plan was developed and where it can be accessed.
- ☐ **Study Population:** Describe the characteristics of the study population, including demographics and clinical characteristics.
- ☐ **Setting and Location:** Provide relevant contextual information that could influence the findings.
- ☐ **Comparators:** Describe the interventions or strategies being compared and the rationale for their choice.
- ☐ **Perspective:** State the perspective(s) of the study and the reasoning for their selection.
- ☐ **Time Horizon:** Report the time horizon for the study and justify its appropriateness.
- ☐ **Discount Rate:** Report the discount rate(s) used and the reason for their choice.
- ☐ **Selection of Outcomes:** Describe the outcomes used to measure benefits and harms.

- **[?] Measurement of Outcomes:** Detail how the selected outcomes were measured.
- **[?] Valuation of Outcomes:** Describe the methods and population used to measure and value outcomes.
- **[?] Measurement and Valuation of Resources and Costs:** Explain how costs were valued.
- **[?] Currency, Price Date, and Conversion:** Report the dates of estimated resource quantities and unit costs, as well as the currency and conversion year.
- **[?] Rationale and Description of Model:** If a model was used, describe it in detail, explain its use, and state if it is publicly available.
- **[?] Analytics and Assumptions:** Describe methods for data analysis, statistical transformation, extrapolation, and model validation.

Results

- **[?] Study Parameters:** Report all parameters used in the analysis, including their sources and any assumptions.
- **[?] Summary of Main Results:** Present the main results, including costs, effects, and the incremental cost-effectiveness ratio.
- **[?] Characterizing Heterogeneity:** Describe any methods used to explore how results may vary for different subgroups.
- **[?] Characterizing Distributional Effects:** Explain how impacts are distributed across different individuals or any adjustments made for priority populations.
- **[?] Characterizing Uncertainty:** Describe the methods used to characterize any sources of uncertainty in the analysis.

Discussion

- **[?] Summary of Findings, Limitations, Generalizability, and Current Knowledge:** Summarize the findings, discuss limitations, and consider the generalizability of the results in the context of current knowledge.
- **[?] Conclusions:** Provide conclusions about the study's findings and their implications for policy or practice.

Other

- **[?] Conflicts of Interest:** Disclose any potential conflicts of interest.
- **[?] Funding:** Identify the sources of funding for the study.
- **[?] Approach to Engagement:** Describe the approach to engaging with patients and others affected by the study.
